

EXEM® FOAM KIT TUBAL PATENCY TEST

de smit medical

Reduce
waiting
times

Reduce your backlog of tubal patency tests with a procedure that is simple, safe, effective and proven

Setup
support

Safe, simple
& proven

A CLEAR ADVANTAGE

A CLEAR ADVANTAGE

Routinely performed

Over 70,000 procedures performed in the UK and Ireland and over 550,000 worldwide

Safe to use

No reported adverse side effects⁶
Eliminates unnecessary exposure to ionising radiation – IR(ME)R

NICE approved and high concordance with HSG

HyCoSy (HyFoSy) should be considered as an effective alternative to hysterosalpingography^{3,4,5,9,10}

Reduced patient discomfort

Lower VAS pain scores when compared with HSG³

Lower cost

Reduced procedure cost when compared with HSG and potentially fewer clinic visits³

Therapeutic effect

Similar spontaneous pregnancy rates following HyFoSy tubal patency test to HSG^{1,2}
Non oil-based contrast eliminates potential associated risks^{7,8}

EXEM® FOAM KIT FOR HYFOSY

The HyFoSy procedure uses ExEm foam to provide clear images under ultrasound in a clinic setting

The ExEm Foam Kit comprises hydroxyethylcellulose, glycerol and purified water which when mixed creates a highly echogenic foam

IR(ME)R HEALTH & SAFETY REGULATION

Justification of Individual Medical Exposures Section 11

'No person shall carry out a medical exposure unless it has been justified by the practitioner as showing a sufficient net benefit giving appropriate weight to the efficacy, benefits and risk of available alternative techniques having the same objective but involving no or less exposure to ionising radiation.'

NICE GUIDELINES

Fertility problems: assessment and treatment
Clinical guideline [CG156]
September 2017

NICE National Institute for
Health and Care Excellence

'1.3.8.2 screening for tubal occlusion using hysterosalpingo-contrast-ultrasonography should be considered because it is an effective alternative to hysterosalpingography.'
